

## TIER 3 PUBLIC NOTICE

### IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

#### Monitoring Requirements Not Met in June 2022 for Town of Wellton

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During **June of 2022** we did not test for Total Organic Carbon and Alkalinity and therefore cannot be sure of the quality of our drinking water during that time. This is a monthly test and testing did resume in July 2022.

#### What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year; how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

<b>Contaminant</b>	<b>Required sampling frequency</b>	<b>When samples should have been taken</b>	<b>When samples were taken</b>
<b><i>Total Organic Carbon and Alkalinity</i></b>	1 sample every month	June 2022	July 2022

#### What is being done?

The Town of Wellton resumed testing and reporting in July 2022.

For more information, please contact Town of Wellton at (928) 785-3348 or [Wellton@town.wellton.az.us](mailto:Wellton@town.wellton.az.us)

Please share this information with other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
